

DRUGS OF ABUSE TEST CUPS

The McKesson Consult drugs of abuse test cup is a CLIA-waived tilt and read urine drug screen that tests for multiple drugs at once. This sensitive and specific test provides quick results in only 5 minutes. The McKesson Consult drugs of abuse test cup comes with built-in specimen validity test and temperature strip to help detect specimen tampering. Each box includes a drugs of abuse test cup procedure card, drug screen cup instruction insert, important technical bulletin, specimen validity tests procedures for cup insert, security seal stickers and adulteration color comparison chart.

Propoxyphene (PPX)	Propoxyphene	300 ng/mL
Tricyclic antidepressants (TCA)	Nortriptyline	1000 ng/mL

Urine drug screen assays provide only a preliminary analytical test result. A more specific alternate chemical method must be used in order to obtain a confirmed analytical result. Gas chromatography-mass spectrometry (GC-MS) or liquid chromatography-tandem mass spectrometry (LC-MS/MS) are the preferred confirmatory methods. Clinical consideration and professional judgment should be applied to any drug-of-abuse test result, particularly when preliminary positive results are indicated.

IMPORTANT PROCEDURE NOTE: Refer to product insert for complete instructions, limitations, and warnings.
